#### **DETAILED ACTION**

## Response to Arguments

Applicant's arguments with respect to claims 1-5 and 8 have been considered but are most in view of the new ground(s) of rejection.

### **PRIOR ART REJECTIONS**

### **Statutory Basis**

# Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

### The Rejections

Claims 1-5 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Matthies (U.S. 6,498,592).

Matthies discloses a tiled display structure with

(1) specifying a first layer wherein said first layer comprises

a first layer element for a deep N-well pattern;

arranging multiple instances of said tile to create a tile array covering a portion of said integrated circuit design;

merging said tiles to produce a deep N-well pattern (see Figure 3)

Application/Control Number: 10/772,029

Art Unit: 2818

- (3) wherein said first layer element is identical in shape to said second layer element (see Figure 3);
- (2) wherein said tile further comprises a second layer, wherein said second layer comprises a second layer element (see Figure 3);
- (4) wherein said first layer element is disposed rotated with respect to said second layer element (see Figure 3);
- (8) further comprising flattening said first layer and said second layer (see Figure 3).

### Allowable Subject Matter

Claim 5 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chuong A. Luu whose telephone number is (571) 272-1902. The examiner can normally be reached on M-F (6:15-2:45).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Steven H. Loke can be reached on (571) 272-1657. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
